EXPERIMENT 9: Design and Development of a GSM Service User Interface Prototype Using Figma.

1. AIM

To develop a user interface prototype for a GSM service using Figma with interactive screens for mobile network services.

2. SOFTWARE USED

- Figma
- Web Browser

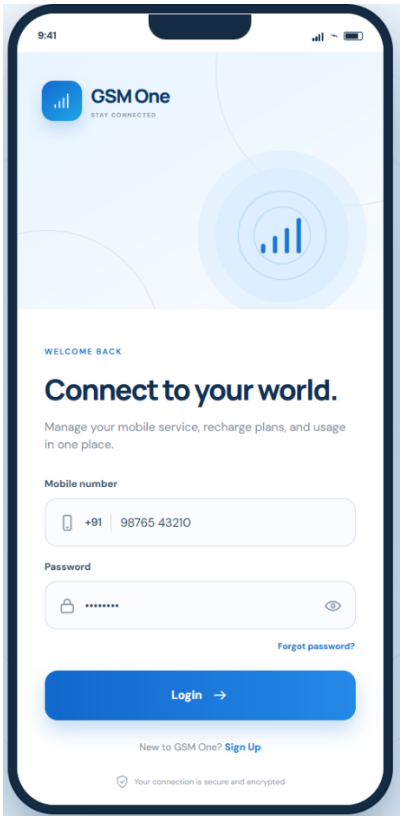

3. PROCEDURE

1. Open Figma and create a new design file.
2. Select a mobile frame.
3. Design the login screen with mobile number and password fields.
4. Create a home dashboard showing balance, network status and data usage.
5. Design recharge, usage details and customer support screens.
6. Add buttons, icons, cards and navigation menus.
7. Connect all screens using the Prototype option.
8. Run and test the prototype.

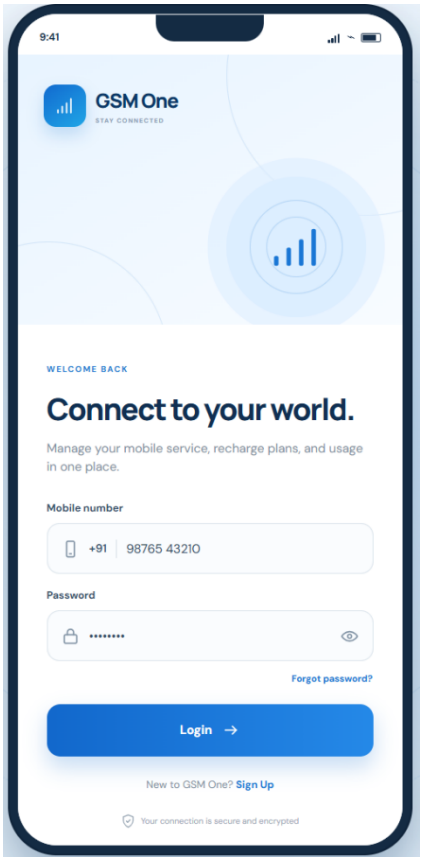

4. PROTOTYPE

The GSM service prototype consists of five screens:

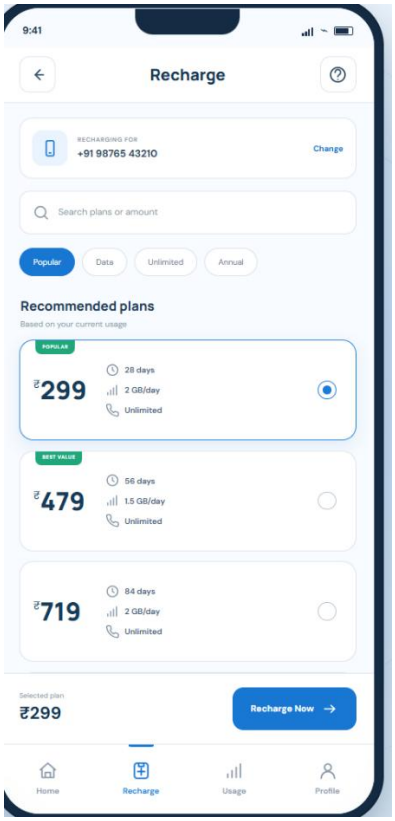

1. Login Screen – User authentication.

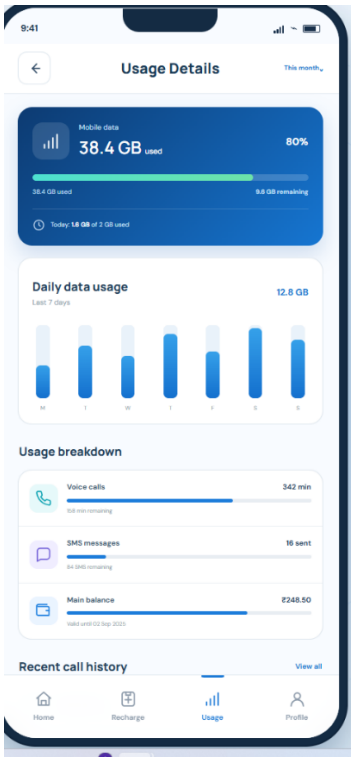

2. Home Dashboard – Balance, network status and data details.

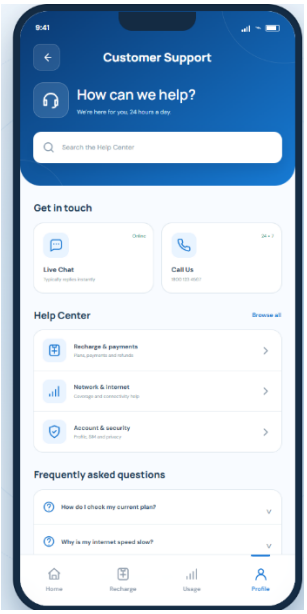

3. Recharge Screen – Recharge plans and payment options.

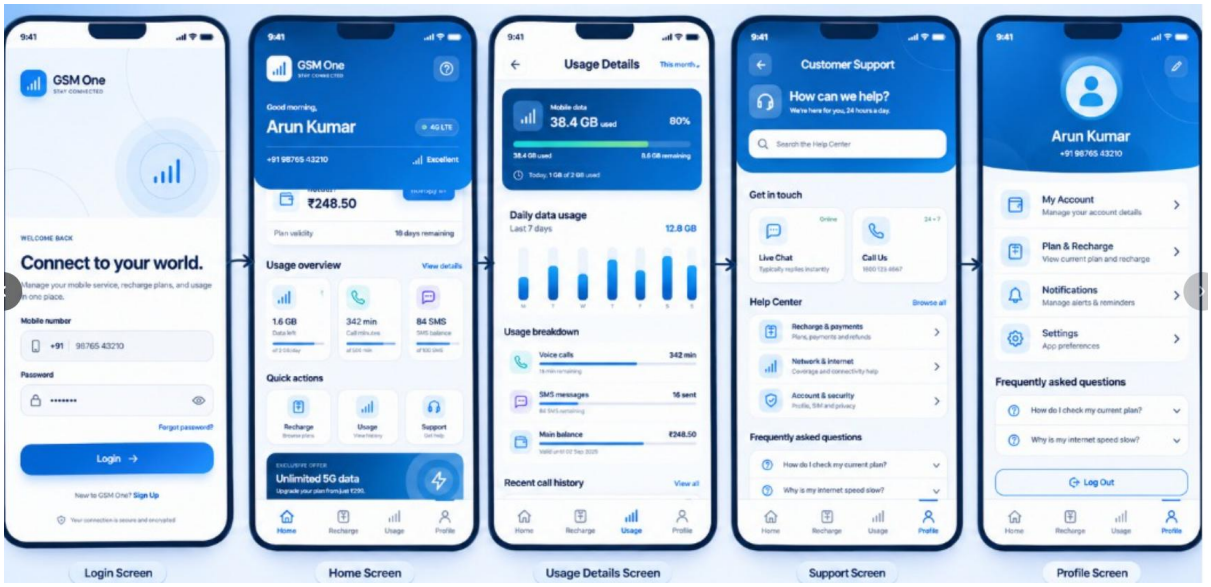

4. Usage Details – Internet, call and SMS usage.

5. Customer Support – Help, FAQs and contact details.

5.DESIGN

5. RESULT

Thus, a GSM service user interface prototype was successfully designed using Figma with five interactive screens and connected navigation.
